Task Release Information

Product & version:	Automation Anywhere Enterprise Version 11.0
Task Release Date:	13th September, 2018
No. of Tasks:	5
Dependency	Solution Design and Share-drive path

Document Purpose:

This document contains process flow details of reusable bot-"Process Structure Creation". The following sections describe the process and its execution.

Overview

This bot will pick the information from the 'Solution Design' and will create the whole process structure.

Pre-checks:

The following are the pre-checks that should exist before running the reusable bot:

1. Make sure that the Solution Design has process name at the 'Index' sheet and all the bot name at 'Bot Description' sheet.
   For reference, please go through the sample 'Solution Design'.

   Sample_Solution
   Document.xlsx

2. Make sure that you have the proper business path where you want to save your logs, input file, output file, etc.

Installation

- Download the bot from Bot Store.

- Double click on <Bot Name>.msi and follow the installation instructions.

For first time users, the "Bot Store" folder is created under <AA Directory>/My Tasks (on your local disk). Folder Structure

Create the following folder structure of the content in the AA Dir:

<AA Directory>

- My Tasks
  - Bot Store
    - **Process Structure Creation**
      - My Tasks
      - FolderStructure.atmx
      - MASTER BOT.atmx
      - Process Structure Creation.atmx
        - SUB MASTER.atmx
      - Sample_Solution Design
      - Sample_Soultio Document
        - SnapShots
        - <png files>
      - Documentaion

      - How to run the ProcessStructureCreation.mp4

      - Error Folder

        - Logs
      - Error Logs Month-Day-Year

  - Snapshots
    - Error Snap Month-Day-Year

Task execution process

1. Launch Automation Anywhere

   PROCESS STRUCTURE CREATION: This bot will pick the information from Solution Design and will create the whole process structure.

1. Process Name under My Task (Pick the Process Name from the Index_sheet of Solution design):
   a. ProcessName_Master Bot
   b. BOTs:
      i. Sub Master Bot
      ii. Folder Structure
      iii. Bot-1-Botname.atmx iv. Bot-2-Botname.atmx
      v. Bot-3-Botname.atmx, etc. (Pick the respective Bot Name from the BOT Description sheet of Solution Design)

2. Config File under My Doc with respect to Process Name

3. Create Folder Structure at business path, which will include:

   a. Machine wise Folder:
   1. Config Folder (For config values. Ex- email sending details)
   2. Input File Folder
   3. Output Folder
   4. Script Folder
   5. Temp Folder   6. Template Folder (If any)   7. Logs:
   a. Audit Logs
   b. Event Logs
   c. Error Logs:
   d. Error Snap Shot

-- END --
